

You received an email from the main office to confirm that local department still holds following assets. You have current month "Holdings Report" (first tab). Follow the steps below

- 1. We have to find SecurityID for the ID's listed below. Use VLOOKUP values below and search for them in the "Holdings Report" tab, column number 9 will be your output for SecurityID.
- 2. Some of the ID's may not be on the list. We cannot have Errors or N/A's, let's modify our VLOOKUP so for any ID missing we put the value "Not on the Holdings Report"
- 3. In order to do that use IFERROR function

You have been asked to provide first 10 "Security ID's" for <u>foreign stock</u> and <u>stock</u> you currently have in the "Holdings" report. If there are <u>ETF's</u>, return "ETF" value in the column below.

Note: This assignment includes IF & OR formulas

Note: Excel logic here is quite confusing, you have to use "IF(OR(" functions in this order

Number	Security ID
1	EFT
2	foreign_stock
3	foreign_stock
4	foreign_stock
5	foreign_stock
6	foreign_stock
7	foreign_stock
8	foreign_stock
9	foreign_stock
10	foreign stock

You are assigned to help a team to migrate first 30 assets into a new system. There is an issue, new system uses a "Unique key" which is equal to "ID" + all the numbers before the "." sign in "Fund ID" column + first 6 signs in "Security ID column"

Tip: the explanation is pretty confusing, there is a sample for the first asset below.

- 1. For this assignment we will have to use "&" + "LEFT" + "FIND" formulas
- 2. First we have to understand that there are 3 columns which have to be combined together. Every column will have different formulas. So how to combine 3 formulas into one column?? Tip: use "&" after each formula
- 3. For the first column "ID", there is no adjustments required (no formulas needed), the second one "Fund ID" will require us to find "." first and than get all the numbers before the "." (Use LEFT and FIND functions), for the third column we need only first 6 signs (Use LEFT function)

Example

ID	Fund ID	Security ID	New System "ID"
1226391	2121		12263912121F

New System "ID"	
12263912121F	
12263932121ES0113
